7.1.2: The Institution has facilities and initiatives for

1. Alternate sources of energy and energy conservation measures

Use of Low wattage and Sensor based PC and Printer:

Rajarambapu College Of Sugar technology, Islampur

Solid waste management:

The peons of the college are allotted classrooms and campus to clean daily. They clean the college and gather litter at a place. The degradable waste such as leaves of trees and other things are collected in a compost pit. Non degradable waste is collected by Municipal Corporation through its vehicle. There are dust bins at different places in the campus. To avoid the plastic in the campus, the institution rigorously avoids use of plastic.

Liquid waste management:

Liquid waste of urinals and other is managed through proper drainage system. Liquid waste which is not possible to recycle is drained to erosion pit, some waste water is drained to trees in the campus.

E-waste management:

The E-waste such as spare parts of computer is stored properly. One technician of the field is appointed to look after the waste management. Repairable computers are repaired and reused. Non repairable monitors, CPUs, electronic devices and scrap materials are sold to scrap dealer for further recycling and appropriate disposal.

Hazardous chemicals and radioactive waste management

Chemicals used in laboratory of department of chemistry are collected by the waste collection vehicle of the Municipal Corporation according there time they come at college and corporation. Less hazardous chemicals are immersed deep into soil behind the laboratory though a pipe line. There are no radioactive wastes in the college.

2.Management of the various types of degradable and no degradable waste:

Any other relevant information – Water Harvesting System

The college has developed well equipped rain water harvesting system. The rain water of major building including main building are collected and used to recharge bore wells of the college. It helps college to meet its need of water within the campus. Recharged bore wells and tanks make water within the campus independent. Water of 10 square feet area is collected through the rain water harvesting pipe line to recharge the bore well.

There are small water tanks built in the college campus to maintain and to preserve water for its daily use though 01 water tanks. Syntax talkies are set at different buildings of the college. The water supply to each building is provided through independent pipe line which is maintained by the college. There are 01 syntax talkies in the college. Tanks and talkies are cleaned once in a month by the peon of the college by following rules of cleaning. Ample, safe, clean, and easy water supply is maintained by the college.

3. Water conservation system:

Plastic Free Campus rule and regulations by RCST islampur

Policy on Plastic Free Campus Plastic pollution is ubiquitous in terrestrial and aquatic ecosystems. Plastic waste exposed to the environment creates problems and is of significant concern for all life forms. Plastic production and accumulation in the natural environment are occurring at an unprecedented rate due to indiscriminate use, inadequate recycling, and deposits in land walls. We have all contributed to this problem, knowingly and unknowingly and we must work to reduce and eliminate plastic pollution. .

Government has decided to take plastic ban as a national level campaign to address the environmental hazards being caused by the indiscriminate use of plastic, Educational institutions must lead this nation-wide endeavour. There is a need for educational institutions to actively contribute to the effort of banning the use of single use plastics. So it is becoming a key responsibility of every citizen of our country not just to "Say No to Plastics" but also to create awareness among the community as whole to stop this pollution and leave behind a green and pollution free place for our future generations.

RCST Islampur has its own policy/practices as per the UGC guidelines to achieve plastic free campuses.

- To carry out awareness drives and sensitizing workshops on the harmful impacts of single use plastics.
- To ban usage of plastics in the institution's premises.
- To Incentivize students to be to carry out similar
- To provide water units to avoid the purchase and use of plastic water bottles.
- To inform about alternative solutions like cloth bags etc., to plastic bottles and other goods on campuses.
- To conduct events on designing ecological and environment friendly goods to minimize the use of single use plastic.
